## Work Experience

### Lake Cumberland Area Development District (Russell Springs, KY)

May 2025 - Present

- Serve a ten county rural area by fulfilling the GIS needs of local governmental institutions requiring collaboration and interpretive skills to transform local interest into mapping products
- Process local GIS and data analysis tasks as requested including maintaining and updating legacy data to create customized transportation, zoning, and administrative maps, using spatial analysis to produce actionable data
- Maintain and update the Kentucky Transportation Cabinet's Linear Reference System (LRS) for county and city roads in our ten county area, utilizing both GIS and differentially corrected GPS data collected in-situ
- Perform several transportation planning services as per our contract with the Kentucky Transportation Cabinet, including submitting GIS deliverables of local transportation infrastructure as well as non-GIS deliverable regarding local contacts, act as a liaison between local needs and state planning, conduct meetings with local officials to inform them of state services and participate in the SHIFT process, and utilize spatial analysis to produce maps and statistics for socioeconomic profile reports for Kentucky Transportation Cabinet road studies
- Perform several utility GIS services as per our contract with the Kentucky Infrastructure Authority, including maintaining and updating data regarding local clean and sewer water infrastructure, and producing mapping products for local clean and sewer water systems
- Produce customized maps for use in community development grants written by our department for local governmental institutions
- Conduct drone operations to collect imagery for community development grants and utility geolocation

### Kentucky Department of Revenue (Frankfort, KY)

August 2024 - April 2025

- Worked with a team of other GIS specialists to create georeferenced data for a larger GIS web-based infrastructure based on non-georeferenced measurements from county PVAs and oblique imagery systems. Utilized SQL to do quality control on thousand of entries of GIS data

### University of Kentucky College of Arts & Sciences (Lexington, KY)

Documenting Racial Violence in Kentucky Project Internship

January 2023 - May 2024

- Utilized GIS Software (QGIS and ESRI ArcGIS) to present historical data as well as doing geographical and historical research of unincorporated communities

Mapshop Internship

January 2024 - May 2024

- Utilized GIS Software (QGIS and ESRI ArcGIS) to analyze rent prices in Lexington by using LiDAR technology, meshing census data with shapefile data, and raster data analysis

## Education

### University of Kentucky (Lexington, KY)

May 2025

Bachelors of Arts - History

Bachelors of Arts - Geography - Mapping and GIS

Minor in Computer Science

GPA: 3.96

### Saint Mary's University of Minnesota (Winona, MN)

June 2027

Graduate Certificate - Data Engineering

### College Extracurricular Activities

UK German Club (President and Social Media Manager)

### Academic Awards

Dean's List

Gyula Pauer Cartography Award

Provost Scholarship

Joseph R. Schwendeman Award

## Skills

Utilizing GIS and Remote Sensing Software (ESRI ArcGIS, ERDAS Imagine, QGIS) in a transportation, utilities, and local government context

Experience with Computer Programming languages Python, HTML, SQL, CSS

Specific experience with Python libraries utilized in GIS and general task automation such as ArcPy, Pandas, OS, NumPy, and SciPy

Performed various extract, transform, and load operations on tubular data using Python

Collaboration skills between several different levels of government for GIS data collection and transportation planning purposes

FAA Part 107 Unmanned Aircraft Systems (Drone) Remote Pilot License

Experience producing and designing data visualizations and maps using cartographic methods
